SoftKIT™ 2.0

SoftKIT™ 2.0 is a comfortable and flexible padding system designed for Allard AFOs. Pressure on the tibial crest can easily be relieved by positioning the neoprene pads between the orthosis and the padding, creating a pressure-free channel. Each package contains two narrow neoprene pads, one extra pad for use while the other is being laundered, and pre-cut pressure-sensitive MikroFix tabs for easy attachment to the orthosis. Compatible with ToeOFF® 2.0, ToeOFF® 2½, ToeOFF® Flow 2½, BlueROCKER® 2.0 and BlueROCKER® 2½. ToeOFF® Flow 2½
