BlueROCKER® 2.0

BlueROCKER® 2.0 is a highly stable ankle-foot orthosis (AFO) for individuals with foot drop, moderate to severe ankle instability, or moderate to severe proximal involvement. It is particularly suitable for individuals with bilateral leg weakness and can also be used for partial foot amputations, with the most proximal level being Chopart.

The orthosis provides support, improves toe-off and contributes to a more stable gait pattern. It features a smooth surface and a heel height of 12–15 mm, depending on size. BlueROCKER® 2.0 is supplied with pre-applied MikroFIX for easy attachment of padding and a complete strap set, available with or without a D-ring. The straps are made from a strong, durable material and can be applied for either inside or outside closure on the orthosis

Recommended Range Of Application

For individuals with foot drop due to conditions such as stroke, multiple sclerosis, post-polio syndrome, muscular dystrophy, spinal cord injuries, traumatic brain injuries, Guillain-Barré syndrome, Charcot-Marie-Tooth disease, myelomeningocele, neuropathy and cerebral palsy.

Contraindications

Foot and/or leg ulcers, moderate to severe edema, moderate to severe foot deformities, and severe proximal deficits (e.g. severe quadriceps spasticity, genu recurvatum, genu valgum or genu varum).

Item No.	Model	Size	L/R	Shoe Size	Footplate Length	Height
289401010	BlueROCKER 2.0	X-Small	Left	32-35	21 cm	36 cm
