ToeOFF® Short

ToeOFF® Short is a specially designed ankle-foot orthosis (AFO) for individuals with foot drop. It is specifically developed for users with a shorter lower leg, for whom our other models may be too long. The orthosis provides support, improves toe-off and contributes to a smoother, more stable gait pattern.
ToeOFF® Short features a shorter tibial section, a wider footplate across the metatarsal area, a lower toe lift and a lower heel height compared with ToeOFF® 2.0. ToeOFF® Short has a heel height of 7 mm in all sizes, compared with 12–15 mm for ToeOFF® 2.0

Recommended Range Of Application

For individuals with foot drop due to conditions such as stroke, multiple sclerosis, post-polio syndrome, muscular dystrophy, spinal cord injuries, traumatic brain injuries, Guillain-Barré syndrome, Charcot-Marie-Tooth disease, myelomeningocele, neuropathy and cerebral palsy.

Contraindications

Foot and/or leg ulcers, moderate to severe edema, moderate to severe foot deformities, and severe proximal deficits (e.g. severe quadriceps spasticity, genu recurvatum, genu valgum or genu varum).

Item No.	Model	Size	L/R	Shoe Size	Footplate Length	Height
289901011	ToeOFF Short, Black	Small	Left	32-35	21,5 cm	29,5 cm
