

## Humerux Humerus orthosis

This humerus orthosis is based on the well-known principles of a "Samiento orthosis", an even circular soft tissue compression. The three circular bands are tightened independently of each other. The orthosis' anchorage over the shoulder area means that it fits well in place without slipping down. The strap that goes under the opposite arm has a removable padding for increased comfort. This provides a comfortable orthosis that is easy to apply and easy for the patient to accept. The material of the orthosis allows the skin to breathe and reduces the risk of irritation. The orthosis has two thermoplastic plates that can be adjusted by heating if necessary and the shape can be adjusted with a scissor. This is not necessary in most cases. The orthosis provides free movement of the elbow joint. The orthosis has an inner sleeve to protect the sensitive skin when tightened. The textile materials are tested in accordance with Öko-tex standard 100 and do not contain latex. Available in a regular and long version.

**Intended use:** Indicated for the treatment of diaphyseal humeral fractures, postoperative treatment of fractures and control of the instability of the fractures focus during the consolidation process.

**Measurement:** Circumference arm proximal.

Item no.	Color	Size	Length	Circumference	Model
62106	Black	Small	25 cm	18-26 cm	Regular
62106	Black	Medium	27 cm	26-34 cm	Regular
62106	Black	Large	29 cm	34-42 cm	Regular
62106	Black	X-large	32 cm	42-50 cm	Regular
62107	Black	Small	30 cm	18-26 cm	Long
62107	Black	Medium	32 cm	26-34 cm	Long
62107	Black	Large	34 cm	34-42 cm	Long
62107	Black	X-large	36 cm	42-50 cm	Long
