

STRAVA SPLINT BATH

State-of-art splint baths with
build-in Cleaning system for
infection prevention.

STRAVA

state-of-art splint bath with build-in Cleaning system for infection prevention.

Strava splint bath is the first on the market to introduce UV sterilization and a high heat "Sanitation mode". With the increased concern from Hospitals and Clinical environments for unit sanitation and patient cross contamination Strava cycles the water over UV light every 2 minutes. In addition, the "Sanitation mode" heats the water to maximum and this dual cleaning system ensures the water is 99.99% free of microbes. *

Instead of traditional metal splint baths Strava is made from a Thermoset Composite material that is known for its durability, insulation, flammability resistance and aesthetic appeal. It comes with an easily accessible transparent hinged lid that prevents the water from dripping outside the tub. Water evacuation becomes easy and fast with a pump system that empties the bath in a few minutes. A uniform heat distribution keeps the set temperature in a window of +/- 1°C and heats the water fast to set temperature saving the clinician time.

The full-color touch screen allows the user to browse and select preloaded thermoplastic settings or create their own favorite settings for fast and precise heating of material. A full menu of additional features allows for clinician customization.

**Tested by independent Microchem Laboratory, Austin Texas specialized in the testing of disinfectants, sanitizers, antimicrobial devices, medical devices and personal care products.*

- ◆ Perfect for both X-LITE® sheets and rolls or other Low Temperature Thermoplastic materials
- ◆ Build-in Cleaning System that ensures the water is 99.99% free form microbes
- ◆ Auto on/off settings
- ◆ Water evacuation via pump system that empties the bath in few minutes
- ◆ Precise temperature reading due to convection heat exchanger (+/- 1°C)
- ◆ Full-color touch screen with pre-loaded Thermoplastic settings from the top manufacturers
- ◆ Convenient side storage container for scissors
- ◆ Transparent hinged lid

Non-stick reusable liner prevents materials from sticking to the bottom and protects your new Splint bath.
