64792 0000	Black	150 mm	10 m	1 dispenser
64793 0000	Hot Pink	150 mm	10 m	1 dispenser

X-LITE® PLUS is suitable for all types of casts and splints. The material is made of a 100% cotton mesh, impregnated with a non-toxic thermoplastic resin. This provides you with a non-toxic and environmentally friendly material completely harmless to medical staff and patient. **EcoCast!**

- X-LITE® PLUS can be shaped easily and quickly on the patient without the use of gloves.
- X-LITE® PLUS is ultra-light and provides an airy and breathable cast.
- X-LITE® PLUS has a soft textile surface which provides additional comfort for the patient.

- X-LITE® PLUS provides a strong, durable cast with just 50% overlap.
- X-LITE® PLUS is re-usable and re-moldable any numbers of times.
- X-LITE® PLUS is available in 5 exciting colors – Black, White, Red, Blue and Hot Pink.

X-LITE® should be heated in a waterbath set at 70°C for 1-3 minutes. The material is fully cured after just 20 minutes.

X-LITE® PLUS can also be used for construction of removable splints and therapists can easily determine the stability of the splint by adding extra layers or individual reinforcements of the material. Hook, padding and other reinforcements attach easily and permanent on the X-LITE®.

X-LITE® PLUS can be re-heated and re-moulded several times for the same patient. Make small changes by spot heating a completed cast or splint instead of making a new one that will cost more, take more time and may cause further discomfort for your patient.

X-LITE® PLUS is available in rolls in six different widths and in a practical 15 cm width dispenser box.

## X-LITE® STOCKINETTE IN A PRACTICAL DISPENSER BOX!

We now offer a round-knitted Stockinette in a soft and durable quality.

The Stockinette is made from polyester and it shapes easily around the extremity, leaving no wrinkles against the skin. Available in a 25 meter roll dispenser box.

Item No.	Colour	Width	Length	Package
