SELECTION[®]

Textile Back Supports in
a new innovative way!

Three functional versions that cover your needs!

SUPPORT FOR BETTER LIFE

Back Supports for different body shapes!

Selection Back Supports are the latest addition to our very popular product line - SELECTION! The back supports come in three different versions. Low for a shorter person or when only a low support over the SI-joint is needed. Regular for more cover over the LSO section and the an Abdominal version with room for when a larger belly section needs extra support.

Some of the special features of Selection Back Supports are the uniquely designed D-rings that follows the contours of the body and help the straps to slide freely. The new reinforcement structure spreads the pressure over a larger area for higher comfort.

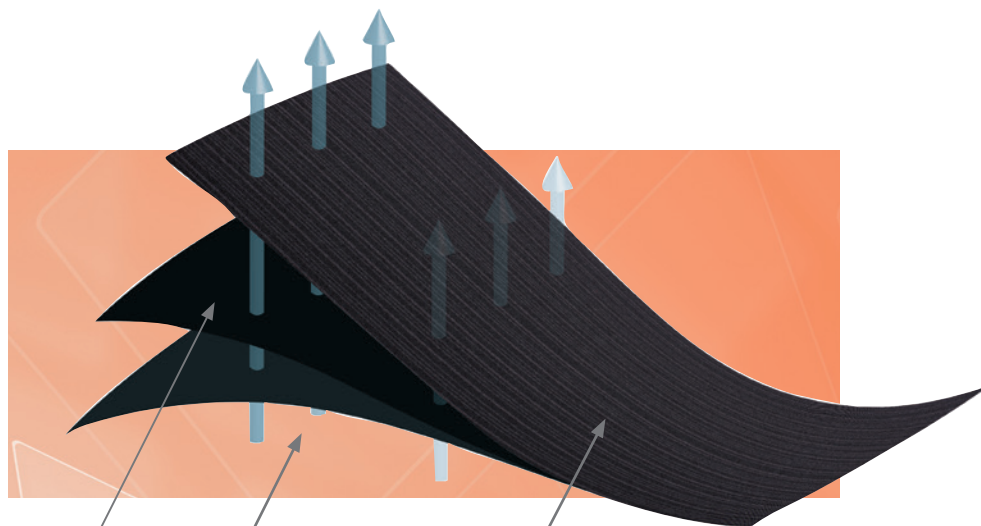

A lot of attention has been given to the front closure to avoid bulky material and instead make a soft and smooth closure that feels comfortable and yet provides good abdominal support.

"Closing straps" to assist donning and doffing.

Pocket to make it easier to don and doff.

Soft inner fabric is kind to the skin.

Semi-glossy outer finish allows clothing to flow smoothly over the surface.

Core function of centre fabric is to offer breathability and transport moisture away from the skin.

When working with the SELECTION line of products, we have chosen a new approach to material selection. New, fresh and with a modern feel. It is a combination that meets the users requirements.

The SELECTION-material is thin and pliable, let's the skin breath and keeps it cool.

All hook and loop material has been integrated into the material to make the brace as low profile as possible.

**Selection Back
Regular & Low**

Item No.	Colour	Size	Hip circumference	Height back	Height front
35400	Black	X-Small	75-85 cm	19 cm	12 cm
35400	Black	Small	85-95 cm	19 cm	12 cm
35400	Black	Medium	95-105 cm	19 cm	12 cm
35400	Black	Large	105-115 cm	19 cm	12 cm
35400	Black	X-Large	115-125 cm	19 cm	12 cm

Selection Back Low & Regular

These two models fit both a straight as well as a curved body type. It comes with extra stabilizing straps that "cross-over" in the back.

The stabilizing straps move smoothly in the specially designed D-rings.

The reinforcement in the back section have new shapes and construction that divides the pressure over a larger surface, yet leaves the spine free from pressure.

On the front section, the extra strap and pocket will assist in closing the front smoothly.

Selection Back Wide (front view)

Selection Back Wide (back view)

Selection Back Wide

Made from the soft and comfortable Selection material.

This model is especially designed for people with a more excessive front section that need extra lift and support.

The closure on the front is divided into two sections to make it easier to put on and also to be able to adjust the height on the front section.

It has extra stabilizing straps that "cross-over" in the back.

The reinforcement in the back section has a new shape and construction that divides the pressure over a larger surface, yet leaves the spine free from pressure.

On the front sections the extra strap and pocket will assist in closing the front smoothly.
