SELECTION® Wrist Rigid

Selection Wrist Rigid has the same features as the soft version, but also a thumb section added for increased thumb support and stability. The thumb strap can be individually adjusted. It comes with a pre-shaped plastic spoon on the palmar side and a soft narrow plastic spoon on the dorsal side. This product is intended to be used when the first CMC-joint needs support and off-loading in cases such as rheumatic disorders, soft tissue injuries or attritional wear. This model is 18 cm long on the volar side.

Recommended Range Of Application
Inflammations, work related strain or when rheumatic and/or degenerative changes are present.

Contraindications
Non known.

Measurements
Wrist circumference
