

SoftKIT™

Every ToeOFF® and BlueROCKER® should have a soft interface between the orthosis and the tibial crest. SoftKIT is a padding system that includes two narrow neoprene pads to create a pressure-free channel to help relieve any potential discomfort from bony prominences. The kit includes pre-cut pressure-sensitive MikroFIX tabs to easily affix the pad to ToeOFF® or BlueROCKER®. An extra pad is included so one can be worn while the other is laundered.
