

SELECTION® Knee Optima Wrap

This model is a "wrap-around-model" with all the features that you could wish for. It combines a range of motion control with medial/lateral stability and compressive support for knee instability. It also give assistance in reducing hyperextension, adding M-L stability and can assist in A-P instability. It has an anatomically shaped patella opening and silicon "Stay-Up" on the inside to prevent migration. Optima Wrap also comes in PLUS sizes to accommodate larger thigh circumferences.

Recommended Range Of Application

Mild to Moderate knee hyperextension, Weak ACL, Partial ACL rupture, Mild to moderate M-L instability, Mild Osteoarthritis, Post surgery.

Contraindications

Severe knee injuries such as ACL/PCL ruptures. Be vigilant for severe problems with swelling and / or poor circulation.
