Active X™ Knee Patella

This open model is designed to stabilize the patella and prevent luxation and sub-luxation. The built-in pad fits into the groove on the side of the patella and "grabs" hold to keep it in place. As an extra support it is combined with a plastic half moon shaped splint that is removable. Active X Patella is made from the ventilated Active X-material to give comfort and ventilation.

Recommended Range Of Application

This orthosis is intended for individuals with patellofemoral pain syndrome (PFPS) such as subluxation, dislocation or malalignment. Can in some cases also be used for patella luxation. Patellofomoral pain syndrome (PFPS). Patella luxation. Patella subluxation.

Contraindications

Non known

Measurements

Knee circumference mid-patella
