Active X™ Long

Active X Long ismade from a ventilated spacer material. This model have two circular strap on the thigh section and two on the calf section. The straps can be positioned individually. All straps have a plastic D-ring. This long version is available in a tube version and a wrap-around version. Both have rigid uprights with flexion- and extensions stops that can be changed for different range of motion settings. Joint is pre-set in 10 degrees of flexion. Other flexion/extensionstops are included in the package.

Recommended Range Of Application

This product in intended for patients with various knee pain such as mild to moderate M-L instability. The support gives a light compression and keeps the knee warm. MCL/LCL injuries. Minor medial or lateral meniscus injuries. Mild osteoarthritis. Bursitis. Joint disorders. Synovitis.

Contraindications

Severe injuries such as ACL/PCL ruptures. Be extra careful with severe swelling problems and blood circulation problems.
