SELECTION® Wide Back Support

This model is especially designed for people with a more excessive front section that need extra lift and support. The closure on the front is divided into two sections to make it easier to put on and also to be able to adjust the height on the front section.It has extra stabilizing straps that "cross-over" in the back. The reinforcement in the back has a new shape and construction that divides pressure over a larger surface, yet leaves the spine free from pressure.On the front sections the extra strap and pocket will assist in closing the front smoothly.

Recommended Range Of Application

Low Back Pain and Back insufficiency with persons that needs extra support in the front secion.

Item No.	Size	Color	Pelvic Circumference	Height Back	Height Front
