VISSION™ Wrist Orthosis with thumb part

Soft and elastic wrist orthosis with a thumb section, made of durable resilient material with a soft and comfortable lining. The orthosis is intended to restrict movement in CMC and MCP 1 joints and to position the thumb in a functional position and to reduce flexion in the wrist. The volar side has a shaped plastic stay. The thumb part has an extra strap that further adjusts the thumb grip.

Recommended Range Of Application

Mild to Moderate CMC and MCP1 instablity, ligament injuries, tendinitis, degenerative diseases, trauma.

Measurements

Wrist circumference.

Item No.	Model	Size	Measurement	L/R	Color
460311009	Wrist with thumb	XX-Small	11 - 12 cm	Left	Black
