

HyMo Textile Orthosis

HyMo is a textile orthosis in shape of a body and/or trousers with short or long sleeves and legs. It is intended for patients with Ehlers Danlos Syndrome. HyMo fits tight against the body and can improve posture and give increased joint stability, i.e. hips and shoulders get stability from the tightness of the material. The HyMo is only available as a made-to-measure orthosis. It is used gradually until the desired time of use is reached, 8 - 10 hours per day. The material in HyMo has been carefully chosen, produced and certified according to Oeko-Tex standard 100, class II. Can be used from 10 years of age and up.

Recommended Range Of Application

Ehlers Danlos Syndrom.

Contraindications

Edema, dislocated joints (not reduced).

Item No.	Model	Color	Type
394000000	Body with short sleeves	Black	Female
