# SELECTION® Fingerloop

A twin orthosis that efficiently holds two fingers or more together. A stronger finger assists a weaker one for support, protection and/or increased range of motion. It can also be used as a static progressive splint for an increased range of motion in the DIP joint.
The orthosis is made in 100% durable and quick-drying nylon. Welded with no seams and therefore easy to cut for a personal fit. One or more pieces can be used at the same time.
The semi-prepared Fingerloop sheet, which is 10 cm wide, can easily be trimmed to individual straps in the desired width by scissors.

## Recommended Range Of Application

Support for the fingers after e.g., injury, surgery, stable fractures, metacarpal fractures, chronic pain conditions, sprains, joint wear, and contractures.

| Item No. | Model | Size | Length | Width | Unit/Pack |
|---|---|---|---|---|---|
